

BCT

PRICE BACNET COMMISSIONING TOOL

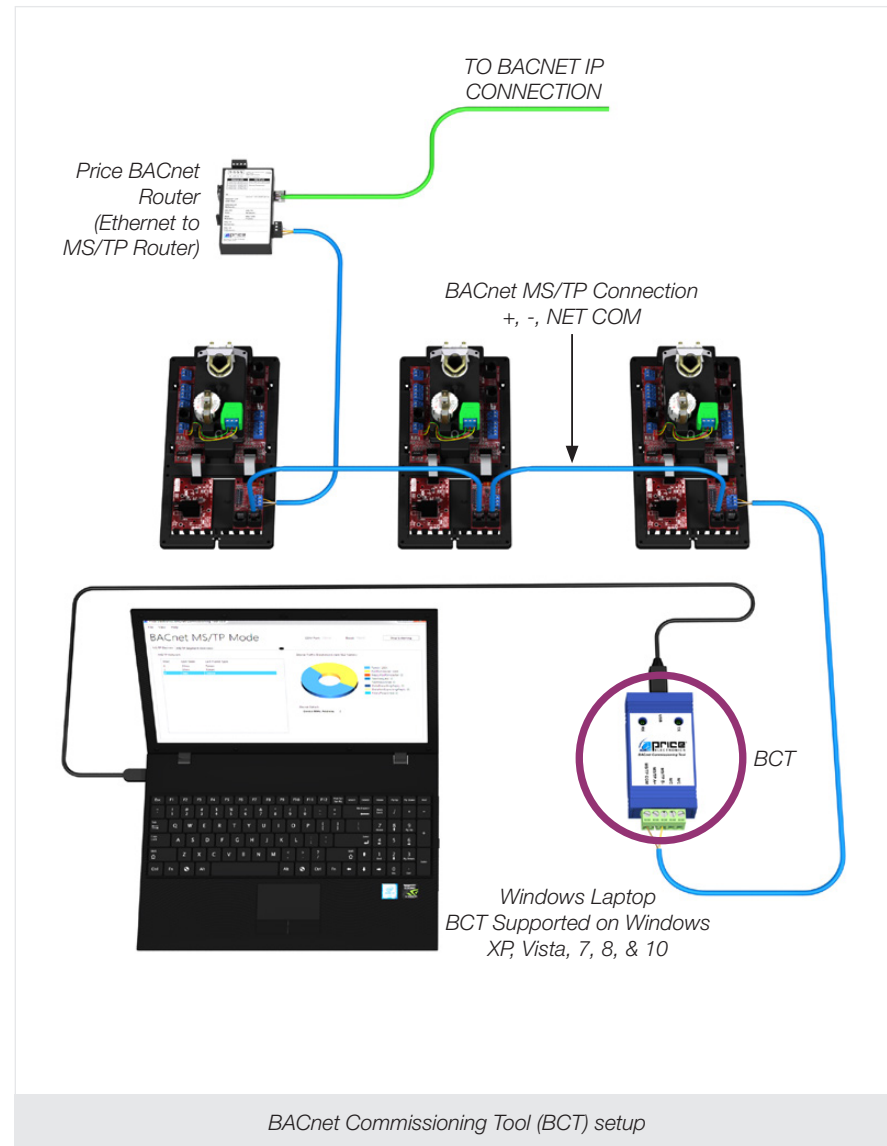

Typical System Configuration

BACnet MS/TP networks can be complex and contain devices from multiple manufacturers, which can make for difficult troubleshooting.

The BACnet Commissioning Tool (BCT) helps troubleshoot BACnet networks when communication between devices is not sufficient. The BCT scans the network and determines which devices are active, which devices are responding slower than others and which devices are missing on a network segment altogether.

Troubleshooting becomes quick and easy with the intuitive BCT software interface, available for free download at www.priceindustries.com.

FEATURES

- + BCT Software: Supported on Windows XP, Vista, 7, 8 and 10
- + BCT Hardware: Adapter connects to an MS/TP network segment
- + Status LEDs for MS/TP communication
