PRTU-IP-RTR
Price IP Router

Typical System Configuration

The PRTU-IP-RTR links the Local Area Network (LAN) and Wide Area Network (WAN), enabling communication and access to the PRTU-BAC-RTR and Web Server on a local network. Router configuration is available via a web browser for PAT, NAT and build-in stateful firewall setup. Port forwarding is also available, enabling LAN-side devices to be accessed remotely online.

FEATURES

+ Displays Power and Ethernet status via diagnostic LED

+ Stateful firewall

+ Web browser configuration

+ PAT, NAT and port forwarding properties

+ DHCP client (WAN) and DHCP server (LAN)

+ Remote router access

+ DIN-rail mounting

+ UL 508, c-UL, CE
